Information Disclosure Statement

1. The information disclosure statement filed 12/29/2005 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of the listed reference AI (EP 1 150 250 A1) that is not in the English language. Reference AI (EP 1150 250 A1) has been placed in the application file, but the information referred to therein has not been considered. This is a very relevant prior art. English abstract alone does not provide adequate information to for the examiner determine the patentability of the claims. Please provide an English translation for EP 1150 250 A1.

The examiner has considered all the other listed references. For EP 0 961 207 A1, the examiner relied on its US equivalent.

Specification

2. The disclosure is objected to because of the following informalities: The term "the pulse generator 12" in line 3, page 8 shall be changed to "the pulse generator 11".

Appropriate correction is required.

3. The abstract should be in narrative form and generally limited to a single paragraph within the range of 50 to 150 words. The abstract should not exceed 25 lines of text.

The abstract is objected because it exceeds 150 words.

Claim Rejections - 35 USC § 112

4. Claims 14-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for the following reasons.

- a. Claim 14 recites "may be delivered" in line 9. This is considered indefinite, because the feature is not absolutely.
 - b. There are insufficient antecedent bases for the following limitations.
- -- Claim 14 recites the limitations "the output signal (SU)", "said row" and "the passage" in lines 9, 12, and 12, respectively.

Allowable Subject Matter

5. Claims 14-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter.

The prior art fails to teach the system of Claim 14 which specifically comprises the following features in combination with other recited limitations:

-- a plurality of processing units (U1 to Un; p_n) for processing measurement pulses, said processing units being arranged in one or more rows and each having an output (SOR1 to

SORn) at which, during successive processing cycles, a measurement pulse that is processed therein is delivered to form the output signal (SU) of said system,

- -- wherein a physical quantity whose spatial values (S1 to Sn) are respectively represented by the measurement pulses (I1 to In) whose order in time is representative of those values (as linked to the preamble); and
- -- wherein each of said processing units (U1 to Un; p_n) further includes inhibition means (BI) for inhibiting the passage toward the outputs (SOR1 to SORn) of those other units of respective measurement pulses, if those measurement pulses are ordered later in the processing cycle concerned than the pulse processed in the unit concerned.

Conclusion

- 6. The prior art made of record in form PTO-892 and not relied upon is considered pertinent to applicant's disclosure.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wenpeng Chen whose telephone number is 571-272-7431. The examiner can normally be reached on 8:30 am 5:00 pm.
